

How do we calculate the shipping charges?

The shipping charges are calculated on the **total order weight** when an order is placed and Printrove charges a slab rate of **Rs. 60 per 500 gms.**

You can refer to the product volumetric weight below and accordingly calculate the shipping charges.

Product	Volumetric Weight	Shipping Charges
T-shirts, Crop Tops & Kids T-shirts	200 gms	Rs. 60
Hoodies and Sweatshirts	950 gms	Rs. 120
Polo T-shirts	400 gms	Rs. 60
Oversized T-shirts	250 gms	Rs. 60
Crop Hoodies	900 gms	Rs. 120
Toddler T-shirts	150 gms	Rs. 60
Plain Face Mask	25 gms	Rs. 60
Phone Cases	125 gms	Rs. 60
Mugs	500 gms	Rs. 60
Notebook	250 gms	Rs. 60
Coaster	75 gms	Rs. 60
Mouse Pads & Pop Grips	100 gms	Rs. 60
Posters	250 gms	Rs. 60
A3 Framed Poster	950 gms	Rs. 120
A4 Framed Poster	450 gms	Rs. 60
Sipper Bottles	500 gms	Rs. 60

Lets calculate the shipping charges for three products: A T-shirt, a Phone Case and a Mug:

- The weight of the order would be 200 gms + 125 gms + 500 gms = 825 gms.
- With the slab rate of Rs. 60 per 500 gms, the shipping charges for the order will be **Rs. 120.**

For a **Cash On Delivery** order, an additional service charge of **Rs. 50** will be applicable.

You can now calculate the shipping charges of each product to include it in your cost price and keep the shipping free for your customers.
