

How to sell internationally with Printrove?

To **expand your market reach** and **scale up your brand**, you can consider selling your products internationally. Thanks to the internet, shoppers will never hesitate from buying beyond borders!

Printrove offers international shipping to help you in reaching your global audience. Continue reading to learn more about our international courier services and what you need to get started selling overseas.

Mandatory Requirements:

The prerequisites for selling internationally with Printrove are as follows.

1. GSTIN Registration

When the products that are shipped internationally are taxable, the shipping charges applied to transport those products are also taxable depending on the rate of tax. Hence GST is necessary to sell internationally.

- ① The goods and services tax (GST) is a value-added tax levied on most goods and services sold for domestic consumption. You can complete your GST registration online with the help of your CA.

2. Invoice

The invoice is sent with your order and contains information about the items in your order. It is required for customs clearance, without which, the order cannot leave the country. Your invoice should contain your **GST Number & Customer's Shipping Details** with Address and Contact Number.

An Invoice shows that you are a **legitimate business** and serves as an **official record of the Sale**. To know how to **generate an E-Invoice** along with the steps to **upload an invoice** to your order, you can refer to the following article.
