**printrove** Printrove

How to integrate my Shopify store?

With the [Printrove - Print & Dropship app for Shopify](), you will be able to seamlessly manage your Shopify orders from the Printrove Merchant panel. This app integrates with Printrove and lets you push new products directly from the merchant panel. The orders that you receive on your store are also pulled into the merchant panel with a click of a button. You won't have to place each order manually.

Here are the steps to install the Shopify app

1. Visit this [link to install the app]()
2. Click on **Add App**. If you are not already logged into to your Shopify store admin, please log in and continue.
3. Click **Install App** to give Printrove the neccessary permisions to access your Shopify store.
4. After the app is installed, login to the Printrove Merchant Panel within the app to connect your store. You can even create a new account on Printrove from here.
5. Once you successfully login, you will be shown a message that the store is connected successfully with Printrove.

Auto Pull Orders

This feature enables the orders to be pulled automatically into Printrove as soon as they are placed on your store. To enable this feature, go to **Profile > Store Settings** and enable the **Auto Pull Orders from Shopify** option.

Auto Place Prepaid Orders

This feature enables the prepaid orders to be automatically placed on Printrove as soon as they are placed on your store. The orders are only placed if there is sufficient credits in your Printrove account. To enable this feature, go to **Profile > Store Settings** and enable the **Auto place prepaid orders** option.

After the app is successfully connected, proceed to add products to your Shopify Store.
